

Project Name: ERM Suite Platinum

Technologies: Python, Django, React, PostgreSQL

Category: Enterprise Web Apps

Industry: Manufacturing

Services: Backend, Frontend, DevOps

Description:

A comprehensive Source of Truth for industrial giants. It replaces fragmented legacy systems with a unified architecture featuring Gantt-based production planners and automated procurement.

Link: [www.\[website\].com/erm-suite-platinum/](http://www.[website].com/erm-suite-platinum/)

Project Name: NexusPay Gateway

Technologies: Node.js, Express, Angular, MongoDB

Category: Fintech Applications

Industry: Financial Services

Services: Security Auditing, Payment Integration

Description:

A global bridge for sub-200ms transaction processing. Supports 150+ currencies and features an AI Fraud Guard that scores transactions based on IP velocity.

Link: [www.\[website\].com/nexuspay-gateway/](http://www.[website].com/nexuspay-gateway/)

Project Name: PatientFlow EMR

Technologies: Java, Spring Boot, React Native, MySQL

Category: Healthcare Portals

Industry: Medical

Services: HIPAA Compliance, Mobile Dev

Description:

Streamlining clinical workflows through digitized records. Integrates EHR/EMR systems with high-definition telemedicine suites and AI triage.

Link: [www.\[website\].com/patientflow-emr/](http://www.[website].com/patientflow-emr/)

Project Name: OmniCommerce

Technologies: PHP, Laravel, Vue.js, MySQL, Elasticsearch

Category: E-commerce Solutions

Industry: Retail

Services: Full-stack, SEO Optimization

Description:

A white-label storefront solution designed to handle catalogs exceeding 1M SKUs with headless architecture and AI personalization.

Link: [www.\[website\].com/omnicommerce/](http://www.[website].com/omnicommerce/)

Project Name: Sentimentalist AI

Technologies: Python, FastAPI, TensorFlow, React

Category: AI Analytics

Industry: Marketing

Services: NLP, Data Visualization

Description:

Empowering CMOs with data-driven insights to optimize ad spend. Features NLP-based sentiment analysis for social media scraping.

Link: [www.\[website\].com/sentimentalist-ai/](http://www.[website].com/sentimentalist-ai/)

Project Name: SmartHome Mesh

Technologies: Node.js, MQTT, MongoDB, AWS IoT

Category: IoT Systems

Industry: Consumer Electronics

Services: IoT Integration, Firmware

Description:

A unified control center for smart devices supporting Zigbee and Matter. Features edge processing for low-latency control.

Link: [www.\[website\].com/smarthome-mesh/](http://www.[website].com/smarthome-mesh/)

Project Name: FleetVision Pro

Technologies: Java, Spring Boot, Angular, PostGIS

Category: Logistics Software

Industry: Transportation

Services: Geospatial Analysis, Mobile Dev

Description:

Reducing fuel costs and improving delivery windows through real-time telemetry and dynamic routing algorithms.

Link: [www.\[website\].com/fleetvision-pro/](http://www.[website].com/fleetvision-pro/)

Project Name: EduSphere LMS

Technologies: Python, Django, Vue.js, AWS Elemental

Category: E-Learning Platforms

Industry: Education

Services: UX/UI, Video Engineering

Description:

A scalable platform for academic institutions featuring a drag-and-drop course builder and gamification elements.

Link: [www.\[website\].com/edusphere-lms/](http://www.[website].com/edusphere-lms/)

Project Name: PropSnap CRM

Technologies: PHP, Laravel, React, Azure

Category: Real Estate Tech

Industry: PropTech

Services: UI Design, Database Management

Description:

Centralizing property listings and lead management. Integrates 360-degree virtual tours and automated leasing workflows.

Link: [www.\[website\].com/propsnap-crm/](http://www.[website].com/propsnap-crm/)

Project Name: RetailPulse POS

Technologies: C#, .NET Core, Angular, SQL Server

Category: Desktop & Web Apps

Industry: Retail

Services: Business Intelligence, Syncing

Description:

Bridging the gap between physical retail and digital data. Provides full POS functionality during internet outages with auto-sync.

Link: [www.\[website\].com/retailpulse-pos/](http://www.[website].com/retailpulse-pos/)

Project Name: Global ERM Suite Platinum

Technologies: Python, Django, React, PostgreSQL

Category: Enterprise Web Apps

Industry: Manufacturing

Services: Backend, Frontend, DevOps

Description:

A comprehensive Source of Truth for industrial giants. It replaces fragmented legacy systems with a unified architecture featuring Gantt-based production planners and automated procurement.

Link: [www.\[website\].com/global-erm-suite-platinum/](http://www.[website].com/global-erm-suite-platinum/)

Project Name: Global NexusPay Gateway

Technologies: Node.js, Express, Angular, MongoDB

Category: Fintech Applications

Industry: Financial Services

Services: Security Auditing, Payment Integration

Description:

A global bridge for sub-200ms transaction processing. Supports 150+ currencies and features an AI Fraud Guard that scores transactions based on IP velocity.

Services: NLP, Data Visualization

Description:

Empowering CMOs with data-driven insights to optimize ad spend. Features NLP-based sentiment analysis for social media scraping.

Link: [www.\[website\].com/smart-sentimentalist-ai/](http://www.[website].com/smart-sentimentalist-ai/)

Project Name: Smart SmartHome Mesh

Technologies: Node.js, MQTT, MongoDB, AWS IoT

Category: IoT Systems

Industry: Consumer Electronics

Services: IoT Integration, Firmware

Description:

A unified control center for smart devices supporting Zigbee and Matter. Features edge processing for low-latency control.

Link: [www.\[website\].com/smart-smarthome-mesh/](http://www.[website].com/smart-smarthome-mesh/)

Project Name: Smart FleetVision Pro

Technologies: Java, Spring Boot, Angular, PostGIS

Category: Logistics Software

Industry: Transportation

Services: Geospatial Analysis, Mobile Dev

Description:

Reducing fuel costs and improving delivery windows through real-time telemetry and dynamic routing algorithms.

Link: [www.\[website\].com/smart-fleetvision-pro/](http://www.[website].com/smart-fleetvision-pro/)

Project Name: Smart EduSphere LMS

Technologies: Python, Django, Vue.js, AWS Elemental

Category: E-Learning Platforms

Industry: Education

Services: UX/UI, Video Engineering

Description:

A scalable platform for academic institutions featuring a drag-and-drop course builder and gamification elements.

Link: [www.\[website\].com/smart-edusphere-lms/](http://www.[website].com/smart-edusphere-lms/)

Project Name: Smart PropSnap CRM

Technologies: PHP, Laravel, React, Azure

Category: Real Estate Tech

Industry: PropTech

Services: UI Design, Database Management

Description:

Centralizing property listings and lead management. Integrates 360-degree virtual tours and automated leasing workflows.

Link: [www.\[website\].com/smart-propsnap-crm/](http://www.[website].com/smart-propsnap-crm/)

Project Name: Smart RetailPulse POS

Technologies: C#, .NET Core, Angular, SQL Server

Category: Desktop & Web Apps

Industry: Retail

Services: Business Intelligence, Syncing

Description:

Bridging the gap between physical retail and digital data. Provides full POS functionality during internet outages with auto-sync.

Link: [www.\[website\].com/smart-retailpulse-pos/](http://www.[website].com/smart-retailpulse-pos/)

Project Name: Infinite ERM Suite Platinum

Technologies: Python, Django, React, PostgreSQL

Category: Enterprise Web Apps

Industry: Manufacturing

Services: Backend, Frontend, DevOps

Description:

A comprehensive Source of Truth for industrial giants. It replaces fragmented legacy systems with a unified architecture featuring Gantt-based production planners and automated procurement.

Link: [www.\[website\].com/infinite-erm-suite-platinum/](http://www.[website].com/infinite-erm-suite-platinum/)

Project Name: Infinite NexusPay Gateway

Technologies: Node.js, Express, Angular, MongoDB

Category: Fintech Applications

Industry: Financial Services

Services: Security Auditing, Payment Integration

Description:

A global bridge for sub-200ms transaction processing. Supports 150+ currencies and features an AI Fraud Guard that scores transactions based on IP velocity.

Link: [www.\[website\].com/infinite-nexuspay-gateway/](http://www.[website].com/infinite-nexuspay-gateway/)

Project Name: Infinite PatientFlow EMR

Technologies: Java, Spring Boot, React Native, MySQL

Category: Healthcare Portals

Industry: Medical

Services: HIPAA Compliance, Mobile Dev

Description:

Streamlining clinical workflows through digitized records. Integrates EHR/EMR systems with high-definition telemedicine suites and AI triage.

Link: [www.\[website\].com/infinite-patientflow-emr/](http://www.[website].com/infinite-patientflow-emr/)

Project Name: Infinite OmniCommerce

Technologies: PHP, Laravel, Vue.js, MySQL, Elasticsearch

Category: E-commerce Solutions

Industry: Retail

Services: Full-stack, SEO Optimization

Description:

A white-label storefront solution designed to handle catalogs exceeding 1M SKUs with headless architecture and AI personalization.

Link: [www.\[website\].com/infinite-omnicommerce/](http://www.[website].com/infinite-omnicommerce/)

Project Name: Infinite Sentimentalist AI

Technologies: Python, FastAPI, TensorFlow, React

Category: AI Analytics

Industry: Marketing

Services: NLP, Data Visualization

Description:

Empowering CMOs with data-driven insights to optimize ad spend. Features NLP-based sentiment analysis for social media scraping.

Link: [www.\[website\].com/infinite-sentimentalist-ai/](http://www.[website].com/infinite-sentimentalist-ai/)

Project Name: Dental 3D Pro

Technologies: .Net, 3D, C++, Direct3D, Geometric Algorithms, HIPAA, OpenGL

Category: Desktop Applications

Industry: Dental and Orthodontics, Medical

Services: Responsive Design, UI Design, UX Design

Description:

Dental 3D Pro. Visualize dentistry work through powerful features. Remove all the guesswork. The Dental Model Challenge Summarized. Time and accuracy are two key factors that make the modeling process in dentistry quite challenging. The process includes: The crown models, especially, need a high level of detail to ensure a 100% match. This manual process not only consumes a lot of time but doesn't guarantee success. This leads to increased expenses for dentists and reduced customer satisfaction. The company's vision was to alleviate these struggles for professionals. They aimed to create a platform that would not require dentists and lab experts to work on the models manually. They sought out quality custom healthcare software development partners to provide accurate high-level orthodontics design applications. Scopic was able to concretize the client's ideas through this dental 3D modeling software. The platform orients, optimizes, and calibrates dental scans to create hassle-free, perfect-match crown models. From scanned images, the software calculates exact tooth segmentation and gum dimensions, creating 3D printer-ready specs.
